Questions to Stakeholders

Please check the box next to the stakeholder question/s from the March 22, 1999, Federal Register notice which your question/comment addresses.

- ☐ 1. What actions do you propose the Agency take to expand FDA's capability to incorporate state-of-the-art science into its risk-based decision-making?
- ☐ 2. What actions do you propose to facilitate the exchange and integration of scientific information to better enable FDA to meet its public health responsibilities throughout a product's life cycle?
- ☒ 3. What actions do you propose for educating the public about the concept of balancing risks against benefits in public health decision-making?
- ☒ 4. What actions do you propose to enable FDA and its product centers to focus resources on areas of greatest risk to the public health?
- ☐ 5. What additional actions do you propose for enhancing communication processes that allow for ongoing feedback and/or evaluation of our modernization efforts?
- ☐ 6. Additional Comments on FDA Modernization Efforts.

YOUR COMMENT/QUESTION

~~We would like to see FDA more quickly expand its warning information on hazardous~~

FDA seems to have instituted processes for including ^{affected} consumers in drug-related advisory committees, and for ensuring that consumers receive warning information about drugs. Why do you not apply similar processes to foods that have been identified as being repeatedly hazardous? Consumers need this information quickly at the point of purchase.
